After publication, it was discovered that, during the production process, a necessary part in the “Conflict of Interest” section was inadvertently omitted.

The original published version [1] stated:

“CONFLICT OF INTEREST

The authors declare no conflict of interest. Giovanni Landoni is serving as the Editor-in-Chief of this journal.”

The corrected version should read:

“CONFLICT OF INTEREST

The authors declare no conflict of interest. Giovanni Landoni is serving as the Editor-in-Chief of this journal. Martina Baiardo Redaelli was a member of the Editorial Board of the journal at that time. Full responsibility for the editorial process for this article was delegated to OK.”

This correction does not affect the scientific content or conclusions of the article.

The Editorial Office sincerely apologizes for this unintentional omission.
