In the originally published article [1] (DOI: 10.22514/sv.2025.149), post-publication review by the Editorial Office identified several errors in data presentation and wording.

In collaboration with the authors, the following corrections have been made in this Correction:

1. Table 1—Incorrect IQR format for the SABIHA score

Original: SABIHA: 2 (2–1)

Corrected: SABIHA: 2 (1–2)

2. Table 2—Incorrect median and IQR for the 3CPO score in survivors

Original: 3CPO (survivors): 0 (1–1)

Corrected: 3CPO (survivors): 1 (1–2)

3. Table 3—Incorrect 95% CI for the 3CPO score

Original: 3CPO: AUC = 0.701, 95% CI = 0.808–0.903

Corrected: 3CPO: AUC = 0.701, 95% CI = 0.638–0.764

4. Results section—Incorrect description of white blood cell count

Original text: “Systolic blood pressure and white blood cell

count were significantly lower in non-survivors...”

Corrected text: “Systolic blood pressure was significantly lower, and white blood cell count was significantly higher, in non-survivors...”

The authors confirm that these corrections are limited to minor errors in data presentation, table formatting, and one incorrect statement in the Results section. The underlying data and statistical analyses remain unchanged, and the primary findings and conclusions of the study are unaffected.

The authors sincerely apologize for these inaccuracies and any inconvenience caused. This Correction has been approved by the Editor-in-Chief. The original article PDF remains available as published and has not been altered. Readers are advised to refer to this Correction for the accurate data presentation.
