Selected papers from Korean Society of Emergency Medicine in 2021-2022

Since the Korean Society of Emergency Medicine (KSEM, https://emergency.or.kr/) was established in 1989, it has been striving to provide the best emergency medical services to its members by focusing on emergency patient care, emergency medical care, and disaster system to protect the health and safety of its people. Therefore, many people are working hard to make the Korean Society of Emergency Medicine always awake, prepare for the future, study steadily, and become members of society.

KSEM is excited to be a part of Signa Vitae journal. We hope articles from our society’s prestigious members would contribute to a special edition in 2021-2022.

Thank you for sharing such a great experience with us.

The Chair of International affairs
Korean Society of Emergency Medicine
